

Project Notes by Rubric Points

A: LOG-IN FORM

Determines user location and translates log-in screen and error messages to Spanish.
`Locale.setDefault(new Locale("es", "ES"))`; is commented out on line 46 of
`JessLambertAppointments`

B: CUSTOMER RECORDS

Buttons to Add, Modify, and Delete customer records can be found in the
`CustomerMainScreen`

C: APPOINTMENTS

Buttons to Add, Modify, and Delete appointments can be found in the
`CustomerMainScreen`
Each appointment is linked to one customer and one user

D: CALENDAR VIEWS

Tabs are used to view the calendar by all, month, and week.
The Buttons to Add, Modify, and Delete are only available in the "All Appointments" tab.

E: TIME ZONES

Appointments are stored in the database as UTC, but are created, viewed, and updated
Using the user's local time

F: EXCEPTION CONTROL

Exception controls can be found throughout the program.
A user cannot leave required fields blank, ComboBoxes are implemented to prevent
A user from entering an appointment outside of business hours,
The DatePicker has days blocked out to prevent a user from setting an appointment
On the weekend or in the past

G: LAMBDA EXPRESSIONS

Lambda expression justification can be found in `AppointmentMainScreenController`
(Lines 158 - 163) and (Lines 191 - 195)
Lambda expressions follow justifications

H: ALERTS

Alerts can be found throughout the program.

The 15-minute Alert pops up right after log-in.

I: REPORTS

Reports are displayed in tabs. You can find the link to the reports in the Bottom right hand corner of the MainScreen

J: ACTIVITY LOG

Activity Log records user log-ins and attempts.

The txt file can be found in the main "JessLambertAppointments" folder
